

Mike Pence is Currently in the Hospital

Overdose on heroin?

Mike Pence is currently in the hospital for what could be a *heroin* overdose. He was seen purchasing said heroin at the corner of State and Davison Roads on a visit to **Davison** to promote Donald Trump's run for office.

Donald Trump states in a recent encounter: "I will not comment on his status nor what happened. That is none of everyone's business."

We will keep you up to date on this.
